Experience

WebMD Health Services | Front End Developer | 2014 – present | webmdhealth.com | Portland, OR

WebMD Health offers wellness tools that use health data to help people make better choices. I help our clients reach their users by making sure the site is usable and accessible to everyone - no matter what device or browser they are using or their level of ability.

- Design & build solutions for clients using JavaScript frameworks like Knockout
- Lead accessibility remediation of our products to adhere to 508 and WCAG 2.0 AA standards and implemented Level Access's AMP testing suite as a part of a culture of accessibility
- Communicate complex development hurdles to business stakeholders to find the best outcomes for our clients
- Lead community efforts to connect people between departments

Aardvark Brigade | Designer | 2009 – 2014 | aardvarkbrigade.com | New Brunswick, NJ & Somerset, NJ

The Aardvark Brigade is a boutique agency that corporate giants and rock stars alike hire to create beautiful effective consumer-facing web experiences. My directive was to design and develop websites but also to promote relationships between developers, designers, project managers, and clients by translating business objectives into images and jargon.

- Lead designer & developer on diverse projects involving numerous varied development environments, Content Management Systems, markup and programming languages, libraries, version control systems and project management workflows including hand coding sites using HTML5, CSS3 and JavaScript
- Selected as interim Art Director for a top tier client and was responsible for building out new functionality
- Facilitated communications as project lead to a third-party development team to implement a complicated and large scale content strategy

AETN | Associate Producer | 2007 – 2009 | aetv.com | bio.com | history.com | Stamford, CT & New York, NY

A&E Television Networks is a top rated cable network that not only shines in prime time but is also a trendsetter on the digital front. They hired this budding designer as a sophomore in college and just couldn't stay away.

- Designed and developed both freeform pages and sites that had to fit within a template
- Brainstormed content ideas with art directors, IT, production and on air talent to create fun and interesting user experiences

Jana Uhrich LLC | President | 2008 – present | janauhrich.com | Fairfield, CT & Seattle, WA

This namesake company brings websites from conception to reality by providing research, and strategy assessments to clients and then using the appropriate technology to make their web presence achieve their business objectives.

- Designed and built custom sites from start to finish using static HTML & CSS, Wordpress and Concrete5
- Planned and executed entire marketing strategies for small businesses using Google Analytics

Education

Marist College | BS | Digital Media | Minors: Psychology & Studio Art | Magna Cum Laude | GPA 3.829 | Deans List | 2009
